UNFPA RWANDA
8th COUNTRY PROGRAMME
2018 - 2023

Ensuring reproductive rights for all
Capitalizing on national commitment and leadership on ICPD

UNFPA’s Leadership in a matured Delivering as One context

Leveraging our technical expertise and convening role on Demographic Dividend, Young People, Family Planning, and Data for Development

Our Value Proposition

- Reinforce mechanisms at decentralized levels
- Use innovative technology to improve cost effectiveness
- Leveraging partnership in DaO context
- Mainstream gender as a cross-cutting component of sexual reproductive health
Getting to Zero Unmet Need for Family Planning

Additional 250,000 new users of Family Planning

Increase Contraceptive Prevalence Rate (Modern Methods) by 9.5%

Compact of Commitment

CPR Baseline = 47.5% (2015)

CPR Target = 57% (2023)
Rwandans especially the most vulnerable including Young People and Women are empowered to access and utilize Sexual and Reproductive Health including Family Planning to harness Rwanda’s Demographic Dividend.
