

## 1. RWANDA'S 2030 VISION STATEMENT

Rwanda envisions to achieve the highest attainable standard of health across the life course for all women, men and young people with equitable access to rights-based quality family planning services towards sustainable socio-economic development by 2030.

	COMMITMENTS
<b>01</b>	Expand strategies for FP awareness raising to address gaps in knowledge, attitude and behaviors on FP and to increase the total demand for FP among community members including men, women and young people in Rwanda.
<b>02</b>	Improve access to quality FP services by increasing the number of FP service delivery points and number of skilled healthcare providers towards increasing FP uptake by 2030
<b>03</b>	Expand the available contraceptive method mix at all levels of FP service delivery points by introducing new FP methods.
<b>04</b>	To link evidence-based programming for high impact interventions with policy development and strategy formulation by conducting studies to inform policies, strategy formulation and evidence-based programming for high impact interventions to achieve FP goals.
<b>05</b>	By 2030, the Government of Rwanda will increase domestic resources to finance FP interventions from the current budget allocation.

The current commitments were developed by the government of Rwanda with the guidance of FP 2030 secretariat in collaboration with MoH/RBC partners including Civil Society Organization and Youth lead Organization for their appropriation of the commitments.
